Energizing a world that demands more.

We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

Discover today's Eaton.

Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2015 sales of \$20.9 billion, Eaton has approximately 100,000 employees around the world and sells products in more than 175 countries.

Planning safety and process optimization: CAD data at the click of a mouse!

- 12,900 article data items and macros
- Convenient selection tool
- Version P8

- Models for approx. 15,000 products
- 80 different neutral & native formats

Eaton is providing its customers with CAD data to offer optimum support during planning. Both electrical and mechanical design data can be called up quickly and conveniently from the Internet at any time. This reduces processing times, minimizes errors and thus reduces costs already in the engineering phase of control panels, systems and machinery.

eCAD: Eaton has product data and macros available for EPLAN Electric P8. After downloading the small EPLANSelection program, you will not only be able to select the items you need from a database containing more than 12,900 products, but will also be able to export them and import them into your own EPLAN item database.

mCAD: Eaton makes 2D and 3D data available for more than 15,000 products. Over 80 different neutral and native formats guarantee compatibility with the project engineering systems of the customer. The models can either be integrated directly into the planning software from the Partcommunity Portal on the Internet or via the CADENAS Partsolution software.

The Pushbutton-Configurator – Select Your Products Quickly and Easily!

info@tm2a.pt

WWW.TM2A.PT

info@tm2a.pt

WWW.TM2A.PT

The Pushbutton-Configurator is available online and is designed to help you select and combine a variety of pilot devices, such as those found in the RMQ-Titan series. The configurator is user-friendly and neatly laid out, provides a quick overview of the various ranges of products, and uses intuitive user guidance to show solutions that match your needs. In addition, once all individual components have been selected, the configurator will show the assembled final product. Moreover, the setup pane shows selected products directly, making it much easier for you to configure the right components for your application.

The integrated Label Editor function can be used to create custom labels for pilot devices, enabling you to customize your applications as necessary. Moreover, the configurator also makes it possible to easily configure complete devices that are put together in a custom-tailored manner. Once you configure your pilot devices, you will be shown a convenient parts list that you can then use to easily order all the components you need. Combined with the various images and integrated links to data sheets, these parts lists ensure that you can easily put together the required documentation for your projects.

RMQ-Titan Pilot Devices Proven and Versatile

Catalog download:
www.eaton.eu/catalog

www.eaton.eu/rmq

The pilot devices in the RMQ-Titan M22 and M30 series are characterized by enormous versatility, making them the perfect solution for a wide variety of applications and processes. In fact, the range of potential applications for which they can be used is further broadened by their high degree of protection. In addition, their ergonomic operators combine stylish design with optimum functionality, and using their new slim contact elements makes it possible to combine RMQ-Titan devices with minimal mounting depths. Finally, their shape and design makes RMQ-Titan pilot devices comfortable and intuitive to use.

The tried and tested M22 product series is now complemented by M30 elements with a slim design. Contact and LED elements are available in two mounting depths for the flush mounting plates for both series. Moreover, the fact that the pilot devices can be connected to the SmartWire-DT communication system makes them ingeniously simple to wire.

Emergency stop buttons in a wide variety of designs are an important element in ensuring that dangers can be safely averted, and accordingly play a key role in protecting personnel and property. Accordingly, the emergency-stop buttons in the RMQ-Titan series are tamper-proof.

Numerous type approvals and classification society approvals ensure that RMQ-Titan devices can be used worldwide.

In short, this comprehensive range of pilot devices is engineered to ensure that your machines, systems, and processes keep running smoothly.

Safe shutdown with RMQ-Titan

The EMERGENCY-STOP or EMERGENCY-OFF buttons are available with and without a key, turn-release, non-illuminated, illuminated with standard LED or with mechanical switch position display (green/red) in the centre of the actuation element. Self-monitoring contact blocks guarantee comprehensive operational safety: even with incorrect installation or after unduly powerful actuation.

Flush RMQ-Titan buttons

RMQ-Titan units with a flush design are the perfect complement to the industry's move towards stylish front panels for machines. These flush pushbuttons feature a modular design and are the perfect match for the RMQ-Titan series, flush contacts, and LED elements. Moreover, the flush transition between their operator and bezel make these units ideal when it comes to sleek looks and cutting-edge applications.

Easy and flexible assembly

RMQ flat front devices are not only characterized by an attractive and sleek design, but also feature the sophisticated mounting system known as RMQ-AFX. When the knurled nut is tightened, a spring element simultaneously ensures that the assembly will automatically adjust to the thickness of the mounting plate being used. RMQ flat front devices are designed for 30.5 mm mounting holes.

Flush and modular: flat rear elements

These flush contact and LED elements, which have a mounting depth of only 30 mm, are perfect for control panels in which every bit of space counts. They feature a one-of-a-kind modular design when it comes to operators, contacts, LED colors, and accessories, with the flush multi-color LED elements opening a whole new world of possibilities when it comes to intelligent control designs for machines.

Fast, flexible labelling – The Label Editor

The Label Editor is available as one of the functions in the Pushbutton-Configurator. Once you put together your pilot device combinations, you can use this function to make a customized laser inscription on your button plates using your own company or project-specific label, logo, or image – easily, conveniently, and custom-tailored to your needs! www.eaton.eu/config/rmq

High-precision settings made easy

The M22-SWD encoder makes it possible to set extremely precise settings on machines by simply turning it and confirming. Moreover, its modular design, combined with a direct SmartWire-DT connection, allows for maximum installation flexibility and ease of diagnostics. The M22-SWD encoder also completely eliminates any potential extra costs that would normally be associated with the use of an encoder.

M30 panel mount connectors	9
RJ45	
→ Page 71	
RMQ-AFX	10
Anti-rotation tab	
Included with the equipment supplied with M30 front elements	
Threaded rings	11
→ Page 70	
Mounting adapters	12
For flush mounting	
For contact and LED elements	
→ Page 48	
Contact elements	13
N/C and N/O	
Universal contacts suitable for use with electronic devices	
Safety function implemented with positive opening as defined in IEC/EN 60947-5-1	
Max. 2 levels, each with 3 contact elements	
→ Page 48	
Flat Rear contact elements	14
Cage Clamp with push-in terminals	
→ Page 53	
Flat Rear LED elements	15
Cage Clamp with push-in terminals	
→ Page 53	

Telescopic clip	16
For adjusting the depth of rear mounting devices in CI and CI-K enclosures and cabinets	
→ Page 69	
Convenient labeling	17
A laser inscription with any text and/or symbol can be added to all button plates, indicator lights, and add-on legend plates from the RMQ-Silver range of products.	
Download: www.eaton.eu/config/rmq	
Keyword: "Pushbutton Configurator → Label Editor function"	
SmartWire-DT	18
Product characteristics	
<ul style="list-style-type: none"> • Clip-fit assembly modular system • Metal bezel, flush • Mounting hole diameter: 30.5 mm • Minimum grid dimension: 40 x 50 mm • Min. degree of protection: IP66 • Up to 6 contacts per mounting location • For switching differing potentials • Approved throughout the world

Self-monitoring contact elements

N/O is actuated when mounted on the pushbutton.

Front mounting 	Screw terminals	1 N/O 1 N/C ☉				M22-K01SMC10 121472	1 unit
		1 N/O 2 N/C ☉				M22-K02SMC10 121474	
Base mounting   	Screw terminals	1 N/O 1 N/C ☉				M22-KC01SMC10 121473	1 unit
		1 N/O 2 N/C ☉				M22-KC02SMC10 121720	
		1 N/O 3 N/C ☉			—	M22-KC03SMC10¹⁾ 173028	
		2 N/O 2 N/C ☉			—	M22-KC12SMC10¹⁾ 173029	

Signal contact actuator for SMC

For actuating the N/O contact in self-monitoring M22-...03(12)SMC10 contact elements
Required for two-channel version with additional signaling (auxiliary) contact

						M22-XSMC 173030	10 units
---	--	--	--	--	--	---------------------------	----------

Double-contact elements

Front mounting.
When using M22-PV... emergency stop buttons, max. 2 contact elements = 4 N/C / N/O

	Cage Clamp	2 N/O			—	M22-CK20 107898	20 units
		2 N/C			—	M22-CK02 107899	
		1 N/O 1 N/C ☉			—	M22-CK11 107940	

Notes ¹⁾ The N/O is actuated when mounted with M22-XSMC.

Configuration of mounting adapter with sequence numbers as defined in EN 50013

x = Sequence number on mounting adapter
y = Function number on contact element

Engineering

M22...SMC10

- ① The self-monitoring contact mechanically monitors the connection on the M22-PV...
- ② The self-monitoring contact mechanically monitors the connection on the M22-K...SMC10 safety contact above it; but not the connection on the M22-PV...

M22-K01SMC10
M22-KC01SMC10

M22-K02SMC10
M22-KC02SMC10

When the self-monitoring contact is mounted correctly, the N/O contact is closed.
The emergency stop/controlled stop circuit will be activated by means of an N/C and N/O connected in series if:

- The emergency stop/controlled stop button is pressed OR
- The self-monitoring contact is mechanically separated from the pushbutton

Customized inscription for devices using the Label Editor function in the Pushbutton Configurator

To add a custom inscription to your device, simply follow the four steps below:

- Open the Pushbutton Configurator by visiting: www.eaton.eu/config/rmq
- Create your label template (the software features menus to guide you through the process)
- Send the label template to the factory by e-mail. The program will automatically set the e-mail address based on the selected product. When you send your template, the Pushbutton Configurator will automatically assign it a filename such as "RMQ_Titan_12345.zip". This filename is part of the article no. that needs to be used when ordering (see ordering examples)
- Send the order to the Eaton sales office or the appropriate electrical wholesale distributor

RMQ *compact* solution Simple. Reliable. Compact.

Download the brochure
by visiting the product page
www.eaton.eu/RMQcompact

The C22 and C30 RMQ *compact* solution series combine connection cables with or without a plug connection together with signaling and operator elements into a single device. This turns them into an all-in-one solution that provides full protection against dust, fine foreign particles, and liquids, for example. Thanks to a high degree of protection of up to IP69K in the front and IP65 in the back, these devices are perfect for direct installation in applications such as woodworking machines and similar machine tools.

RMQ *compact* solution devices feature a sleek design that enhances machines, systems, and a broad range of additional applications. Whether you decide on our traditional C22 design or on the flush C30 version, you can rest assured knowing that we have a solution for every application out there.

The RMQ16 Series Squeezes Signaling and Control into a Tiny Space

www.eaton.eu/rmq16

Square RMQ16 pilot devices with sizes of 18 mm and 25 mm are the perfect solution for control interfaces where space is at a premium. The various front elements can be installed with a perfect fit in any of their possible four directions and, thanks to their IP65 degree of protection in the front, are the perfect choice for safe use in harsh conditions. The series is not only characterized by a wide range of indicator lights, pushbuttons, selector switches, and key-operated switches, but its label editor function within the Pushbutton-Configurator also makes it possible to get customized laser inscriptions. The LED lamps and the contact elements in the series are connected using 2.8 mm x 0.8 mm female push-on connectors.

RMQ16 emergency stop buttons are tamper-proof in compliance with ISO 13850 / EN 418 and have a pull-to-reset mechanism. They can also be used as emergency switching off buttons.

Product features

- Front dimension and minimum grid dimensions 18 x 18 mm or 25 x 25 mm
- Mounting hole diameter 16.2 mm to EN 50007
- Degree of protection IP65
- For switching differing potentials
- Suitable for use with electronic devices to IEC/EN 61131-2
- Technical data according to IEC/EN 60947-5-1
- Approved throughout the world

Foot and Palm Switches for Universal Use in all Kinds of environments

The large actuation surface on our heavy-duty FAK foot and palm switches makes them both intuitive and quick to use. In addition, they feature a tamper-proof design, preventing tampering during use. FAK devices can be actuated by hand, fist, elbow, or foot, ensuring that quick action can be taken to protect personnel and property whenever necessary. Finally, a high degree of shock resistance and extremely high IP67, IP69K degrees of protection make FAK units the ideal device for rugged applications.

FAK foot and palm switches with a red actuation surface on a yellow background are approved for use as emergency stop buttons. They perfectly match the characteristics required in DIN EN 60204, Safety of machinery – Electrical equipment of machines, and meet all relevant requirements. Moreover, the devices are tamper-proof (see IEC 60947-5) and feature positive-opening contacts (see IEC 60947-5-1).

Signal Operating States Quickly, Clearly, and Flexibly

SL7/SL4 signal towers configurator
www.eaton.eu/config/SL

SL4 and SL7 signal towers are used to continuously signal operating states for machines, systems, and processes. Their scope of application is extremely wide-ranging, going from production, through logistics, all the way to retail. This is in no small part thanks to the fact that the fast and clear signaling they provide ensures smooth and safe operation in any environment.

The light and acoustic modules in the series can be configured flexibly both in terms of volume and of the specific visual signals they emit. This versatility is only further enhanced by the signal towers' high-performance LEDs, which ensure that visual signals are recognized even under adverse light conditions. Moreover, a high IP66 degree of protection makes it possible to use the signal towers in demanding environments, such as outdoors.

With a diameter of 40 mm / 70 mm, SL4 and SL7 signal towers feature extremely compact dimensions designed to save space. In addition, only a few steps are required in order to quickly and easily install and remove them, which can prove to be a tremendous advantage when packing and transporting control panels or machines.

Connecting the signal towers to a SmartWire-DT communication system cuts down on wiring time and reduces the number of digital outputs required from your PLC. This, combined with the fact that data from the switchgear connected with SmartWire-DT will be processed in your PLC, ensures that operating states such as impending overloads will be detected and signaled with the signal towers immediately. The result? A marked increase in your systems' availability.

WWW.TM2A.PT info@tm2a.pt

Module for filament lamp, continuous light 1

Without light element (filament lamp with BA15d socket)
 Easy mounting with bayonet mount
 Modules can be arranged in any order
 Max. 2 x 5 modules that can be actuated individually (two with base module SL7-CB-D only)
 Degree of protection IP66
 Operating mode: 100% DF (duty factor)
 → Page 163

Module with LED, continuous light 2

Easy mounting with bayonet mount
 Modules can be arranged in any order
 Max. 2 x 5 modules that can be actuated individually (two with base module SL7-CB-D only)
 Degree of protection IP66
 Operating mode: 100% DF (duty factor)
 → Page 163

Module with LED, flashing light 3

Easy mounting with bayonet mount
 Modules can be arranged in any order
 Max. 2 x 5 modules that can be actuated individually (two with base module SL7-CB-D only)
 Degree of protection IP66
 Operating mode: 100% DF (duty factor)
 Flashing frequency 2 Hz
 → Page 161

Module with LED, strobe light 4

With a fixed flashing frequency 1.4 Hz
 With LED for effective signaling effect with various flashing sequences (flashing frequency 1 - 2.6 Hz)
 Easy mounting with bayonet mount
 Modules can be arranged in any order
 Max. 2 x 5 modules that can be actuated individually (two with base module SL7-CB-D only)
 Degree of protection IP66
 Operating mode: 100% DF (duty factor)
 → Page 162

Acoustic module 5

Easy mounting with bayonet mount
 Set up as topmost module
 Max. 2 x 1 module that can be actuated individually (two with base module SL7-CB-D only)
 Degree of protection IP66
 Permanently integrated cover plate
 Operating mode: 100% DF (duty factor)
 Sound pressure 80 dB, frequency 4000 Hz
 → Page 164

Acoustic module 5a

Continuous tone or pulsed tone - adjustable with internal dip switches
 Frequency: 2800 Hz
 → Page 164

Acoustic module 5b

Multi-tone (8 tones) - adjustable with internal dip switch
 Frequency 500 - 2700 Hz
 → Page 164

Acoustic module 5b

Continuous tone or pulsed tone - can be actuated externally; takes up 2 inputs (2 modules)
 Frequency: 2800 Hz
 → Page 164

Base module for mounting on both sides 6a

Easy mounting with bayonet mount
 Degree of protection IP66
 With cover plate
 With Push in terminals
 → Page 166

Base module for vertical mounting on one sides 6b

Plug-in connection M22
 → Eaton Online Catalog

Base module can hold tubes 6c

→ Page 165

Base module with external fixing holes 6d

→ Page 165

Base module one-sided with bracket 6e

→ Page 166

Base module with internal (on the inside) fixing holes 6f

→ Page 165

Base module with built-in (pre-assembled) fixing screws 6g

→ Page 165

Base module with aluminium tube and plastic foot 6h

Aluminium tube 100 mm, 250 mm or 400 mm
 → Page 165

Base module with base adapter for slipping onto place (rapid mounting and wiring system) 6i

Aluminium tube 100 mm, 250 mm or 400 mm
 → Page 165

Base module with aluminum tube and screw fixing 6j

Aluminium tube 100 mm, 250 mm or 400 mm
 → Page 165

Base module with base adapter for slipping onto place (rapid mounting and wiring system) and SmartWire-DT connection 7

Aluminium tube 100 mm

The RMQ C22 Series: Powerful Functionality with a Compact Design

Download product range catalog „C22 compact portfolio“ www.eaton.com

RMQ C22 pilot devices are not only characterized by compact dimensions and a conventional screw connection, but also feature the same design that has made units such as our M22 modular pushbuttons stand the test of time. C22 devices are built as monolithic units with an “all-in-one” focus that combines contacts and lamps in a single housing.

In addition to a comprehensive selection of operators and selector switches, the C22 product portfolio also includes emergency stop buttons in a variety of versions, including lockable units.

C22 devices combine multiple components in a single device. This compact design means that only one article no. is required, making product selection and ordering much easier and faster. On top of this, these devices have an extremely long mechanical life and are suitable for worldwide use.

XV HMI/PLC: Easy and Convenient Operation for a Rapidly Changing World

Eaton's XV HMI PLC touch panels comprise a range of products that has been fine-tuned to perfection and can be seamlessly integrated into a variety of performance classes. Capacitive, resistive, and infrared touch technology devices are available in display sizes ranging from 3.5" to 15" with a plastic, metal, or stainless steel housing. Moreover, an on-board SmartWire-DT master interface makes it possible to achieve significant savings all the way from the hardware planning stage through commissioning.

With its multi-touch display HMI PLC units, the XV300 series has opened a whole new world of intuitive and convenient operation. These panels feature the same ease of use as modern mobile devices, such as smartphones and tablets, but upgraded for industrial applications.

Combined with a small mounting depth, the completely flat, anti-reflective, and tempered glass panel in XV300 units ensures that these devices not only meet the most demanding design and hygiene requirements, but are also ideal for use in harsh industrial environments.

Products and Brochures

CEAG products from Eaton's Crouse-Hinds series include signal and control devices for a reliable operation in harsh environments.

Enclosures in high degree of protection (IP66) are available in impact-resistant plastic, glass fiber-reinforced polyester, light alloy or stainless steel with a high resistance to chemicals.

The portfolio includes explosion-protected built-in components designed for panel mounting and use in zones 1 and 2. In addition to control units, it also includes signal lamps, pushbuttons, and switches. Moreover, the switch and pushbutton top parts can be combined with various contact systems.

Control units are available in enclosure solutions that make them suitable for use in zone 1, 2, 21, and 22. Up to three built-in components can be installed in each enclosure. Even the light alloy and stainless steel enclosures are particularly characterized by high mechanical and thermal resistances.

Explosion-protected built-in components

The use of CEAG signal and control devices for panel mounting applications is approved for panel thicknesses of up to 5 mm. The panel built-in devices, signal lamps, pushbutton, and switch bases can be installed in a matter of seconds by using the bayonet mount on the devices. Single-wire installation is easy and clear. Slip-on strain-relief fittings and protective caps for the cable connections can be retrofitted on all panel mounting devices, at which point the devices become fully certified units.

This approach eliminates the need to configure and keep spares of panel built-in devices with different cable lengths.

Built-in components for control units

The variety of built-in components available means that custom-tailored control units for specific customers can be put together within the scope of type examination. The switch and button top parts can be combined with a variety of contact systems as necessary.

Explosion-protected control units

Enclosure solutions made of low-temperature impact-resistant thermoplastic, high-quality die-cast aluminum (AlSi), or stainless steel (AISI 316) are available. The well-engineered design behind the plastic housing makes it possible to achieve an optimum cable connection thanks to the fact that the side panels are drawn deeper.

In order to make cable routing easier, the built-in components can be snapped out from the housing.

Mounting openings can be left unused so that certified genuine CEAG components can be retrofitted as necessary. In this case, the openings will be sealed at the factory with blanking elements.

Assortment

The explosion-protected pilot devices are available as pushbuttons, double pushbuttons, mushroom-head pushbuttons, emergency stop mushroom-head pushbuttons, key-operated pushbuttons and LED signal lamps with a number of designs. In addition, a variety of accessories, including label plates and protective caps, are available as well.

In the case of explosion-protected control units, the built-in components are installed inside an enclosure, making them suitable for use in zone 1 and 2 explosive gas areas and zone 21 and 22 explosive dust areas. The corresponding enclosures made of plastic, light alloy, or stainless steel feature a high degree of protection (IP66).

Explosion-protected built-in components

for zone 1 and 2

Eaton Crouse-Hinds products are suitable for use in harsh and demanding environmental conditions.

Quick and easy installation of built-in components in control panels.

Explosion-protected enclosure solutions

for zones 1, 2, 21 and 22

Our Service – Your Benefit

See More, Do More

- We increase your profits
- We improve your productivity and quality
- We reduce your total cost of ownership
- We simplify your sourcing and ordering processes
- You can focus on your core competencies
- Environmental benefit:
We minimize your packaging and transportation effort

To find the right contact person

At Eaton, we believe that building and maintaining strong relationships with our customers is something that deserves our undivided attention.

That is why you can rest assured knowing that you will be able to count on us for every project from the very start. Simply contact us to get personalized one-on-one advice. To quickly and easily find the appropriate contact, please refer to the contact addresses below.

In just a few steps, we will get you the contact information for the person or team in charge of support for your specific industry in your region.

To find the right contact person anywhere in the world, visit:

Eatons After Sales Service

Eaton is known for its unparalleled after-sales support for low-voltage switchgear, switchgear systems, and services. For more detailed information, as well as to view our terms and conditions, please visit www.eaton.eu/aftersales

Europe, Middle East, Africa24/7

Hotline

For immediate support please call +49 (0) 180 5 223822* (24/7). You will receive competent and fast, round the clock assistance, with unplanned machine and system stand stills, system malfunctions and device failures.

(* 0.14 Euro per minute from the Deutsche Telekom AG network)

Helpdesk

Eaton specialists: +49 (0) 228 602 3640 (Monday–Friday from 08:00–16:00 CET) or contact your local Eaton representative.

We offer extensive support from commissioning to application queries as well as in the area of fault analysis, which can also include remote diagnostics.

We can also offer you an individual consulting service contract which is tailor-made to suit your requirements.

If you would like to communicate your service queries in writing, please use the following e-mail address:

AfterSalesEGBonn@eaton.com

At Eaton, we're energized by the challenge of powering a world that demands more. With over 100 years experience in electrical power management, we have the expertise to see beyond today. From groundbreaking products to turnkey design and engineering services, critical industries around the globe count on Eaton.

We power businesses with reliable, efficient and safe electrical power management solutions. Combined with our personal service, support and bold thinking, we are answering tomorrow's needs today. Follow the charge with Eaton. **Visit eaton.eu.**
